- ▶ Free for both authors and readers
- ▶ Relies on personal initiative of a few researchers

- ▶ Free for both authors and readers
- ▶ Relies on personal initiative of a few researchers

- ▶ Scientific tasks
  - ▶ Assigning submissions to editors
  - ▶ Ensuring that the review process runs smoothly
- ▶ Non-scientific tasks                heavy...
  - ▶ maintenance of the submission/review platform
  - ▶ helping editors struggling with the platform
  - ▶ maintenance of website
  - ▶ handling email problems (returned emails, etc)
  - ▶ maintenance of LaTeX style
  - ▶ creating journal issues
  - ▶ dblp
  - ▶ doi
  - ▶ ...
  - ▶ computers, disks, backups (Open Journal Hosting, Carleton)

- ▶ Free for both authors and readers
- ▶ Relies on personal initiative of a few researchers

Risks

- ▶ Short-term: delays in publication
- ▶ Longer-term: sustainability?

Considering an option (?): apply to Dagstuhl

- ▶ Professional handling of non-scientific tasks
    - ▶ better quality, more efficient
- ▶ More time for managing editors $\implies$ improved review process
- ▶ Long-term sustainability

Considering an option (?): apply to Dagstuhl

- ▶ Professional handling of non-scientific tasks
  - ▶ better quality, more efficient
- ▶ More time for managing editors $\implies$ improved review process
- ▶ Long-term sustainability

- ▶ $\sim$ 150 € processing cost for each article
  - ▶ no profit
    compare with $\sim$ 2500 \$ for commercial publishers
    or 1000 CHF ($\sim$ 930 €) for MDPI https://www.mdpi.com/about
  - ▶ cheap for most of us, waiver necessary for some of us
  - ▶ not compatible with the *Free Journal Network*
          *APCs must be "opt-in", never "opt-out"*
